

Webull Canada Celebrates Two Years with Platform Advancements and AI-Driven Innovation

TORONTO, January 6, 2026 - [Webull Canada](#), an online investment platform and subsidiary of Webull Corporation (NASDAQ: BULL), celebrates its second anniversary following another year of strong growth, platform enhancements, and continued success in the Canadian market. As part of Webull's rapidly expanding global footprint, the platform has surpassed US\$1 billion in assets under management, underscoring its scale and momentum and reinforcing Webull's position among the largest global broker-dealers worldwide.

Since its launch in 2024, Webull Canada has continued to redefine possibilities for Canadian retail investors by delivering professional grade tools and analytics through a powerful yet user friendly platform. Over the past two years, the company has consistently expanded its offerings to provide new opportunities for users.

In 2025, Webull Canada rolled out options trading for registered accounts, launched options Level 1 and 2 for cash accounts along with Advanced Order Types, added over-the-counter securities trading, and most recently launched options Level 3 for margin accounts. Webull Canada also launched internal cash account transfers, which was a popular request from clients. The company continues to deliver powerful desktop trading capabilities that give retail investors the tools for greater success.

The past year was also marked by significant technological advancement with the launch of app Version 11, Webull's most sophisticated platform to date. The upgrade features a redesigned Options Discovery page that simplifies how investors identify and analyze options opportunities, as well as the integration of Vega, Webull's AI-powered research screener, which brings intelligent, data-driven insights directly into the trading experience. Together, these enhancements reflect Webull's commitment to making institutional-grade capabilities accessible to everyday investors.

"It's been an impactful two years for us, and I couldn't be more excited about what's ahead," said **Michael Constantino, CEO of Webull Canada**. "The launch of Version 11 and the integration of Vega are just the beginning of what we have planned for 2026. We're bringing innovations that will fundamentally change how Canadians invest, giving them the freedom to trade on their terms, whenever they want. Our community has placed tremendous trust in us, and we remain committed to delivering the tools and capabilities they deserve to build their financial futures."

Looking ahead to 2026, Webull Canada plans to further expand trading flexibility and market access. The company expects to further extend trading hours from 5:30pm to 8:00pm, and expand 24/5 trading capabilities, fractional/notional trading, and short selling capabilities, providing users with greater control over when and how they trade. Webull Canada also plans to add crypto coin investments, opening access to new asset classes for Canadian investors.
