Webull UK Expands Offering with New Account Types and Access to UK Shares and ETFs

London, UK – 9 October 2025 – Webull UK, an online investment platform and subsidiary of Webull Corporation (NASDAQ: BULL), today announced significant enhancements to its service, giving retail investors greater choice, flexibility and cost-effective access to markets through new account types and the ability to trade UK-listed equities and ETFs.

"By introducing UK shares and ETFs alongside flexible account options, we're giving our customers more tools to match their goals and trading styles,' said **Nick Saunders, Chief Executive Officer at Webull UK.** 'Lower costs, broader access and a straightforward experience remain central to our mission as we grow in the UK market."

Webull UK is launching two account tiers designed to meet the needs of both casual and active traders:

- **Webull Go**: A no-fee account providing access to US shares and options, the FTSE 100, and 20 popular ETFs.
- **Webull Meridian**: A premium account priced at £5 per month (reduced to just £0.01 until the end of 2025). Meridian clients benefit from lower commission rates, reduced FX fees and access to the full range of nearly 1,000 UK-listed shares and ETFs. Multi-currency accounts and priority access to new product launches are included, making Meridian well suited to regular traders.

Across both account types, Webull is also reducing its standard commission on US equities to a flat $0.10 per trade, previously set at 2.5 bps with a $0.10 minimum.

Through its ongoing partnership with Upvest, Webull UK is expanding its product range to include UK-listed equities and ETFs. Active traders will appreciate the ability to invest in domestic companies, while the addition of ETFs offers longer-term investors a cost-efficient way to diversify across markets and sectors, with greater flexibility than traditional share-by-share investing.

Symmie Swil, UK GM at Upvest, comments: "At Upvest, we are delighted to be chosen by Webull UK to power their next stage of growth. With this expanded product offering, Webull UK's end users will benefit from greater flexibility, fast execution, and a seamless trading experience. As Europe's leading investment infrastructure provider, Upvest's mission is to make investing as easy as spending money by making affordable and digital-first experiences accessible to all. Our partnership with Webull UK delivers exactly this: enabling investment journeys that are personalised, flexible, and intuitive."
